

TECHNICAL SKILLS

Programming: Swift, GraphQL, Python, Objective-C

Tools: XCode, Git, CI/CD (GitHub Actions), Figma, GitHub, Proxyman, Insomnia

PROFESSIONAL EXPERIENCE

GitHub - iOS Engineer - Dallas, TX → Amsterdam, Netherlands (Remote) December 2021 - Current

- Collaborate with design, product, and API teams to build new features on iOS including [Copilot](#), [Achievements](#), [Projects](#), Linked Issues and others.
- Using UIKit and SwiftUI with MVC architecture to build new features in a modularized codebase.
- Triage and fix bugs related to data inconsistency, accessibility, UX or other areas.
- Contribute to GitHub.com GraphQL API to support mobile features.
- Responsible for the launch of [Achievements on mobile](#), improved [localization](#), and [mobile forking](#) working with other client and API engineers, product and communication to launch the new feature.
- Ensure the app meets accessibility standards for assistive technologies, contrast ratios, and other user defined accessibility preferences by leading accessibility audits, triage sessions, and working with users of accessibility tools (VoiceOver).
- On a rotational basis, manage releases, responsible for ensuring builds are submitted for approval and delivered to proper testing groups.

Match Group - iOS Engineer - Dallas, TX, United States

Tinder - <https://apple.co/3onNA7C>,

June 2021 - December 2021

- Help launch MVP of upcoming feature with Tinder Revenue iOS team
- Build new feature UI with internal autolayout DSL
- Emphasize strong testing with both snapshot and unit testing and VIPER architecture
- Collaborate extensively with backend, product, design, and other iOS engineers to ensure a quick time to market and high quality product.

Ship Dating App - apple.co/2W1VSmZ,

April 2020 - June 2021

- Launch Ship Party, a group video chat with a shared ‘shipping’ experience with synchronous swiping
- Launched redesign of dating profile, edit profile, and added many other new features as part of small 2 person iOS team
- Write robust and clean code following architecture guidelines with ReactiveSwift, MVVM architecture
- Contribute to building a more testable codebase emphasizing mockability and snapshot testing to reduce regression risks and improve stability
- Build and update features collaboratively with designer and product manager, leveraging Figma to prioritize consistent styling and reusability. (UIKit with Storyboard and programmatic layout)

Fidelity Investments - apple.co/2afsuDq, iOS Engineer - Westlake Texas, United States June 2018 – April 2020

- Work with designer to create features to improve user experience on multiple device form factors leveraging Auto Layout and UIKit (Swift, Objective-C)
- Work with VoiceOver user, designer and customer service representatives to improve accessibility and overall usability
- Write tutorials and present about testing, tools, and APIs around accessibility with hands-on exercises
- Triage production issues using Splunk, Firebase analytics to understand and mitigate the source of crashes or other critical app issues.
- Built “Fin-Discourse” (Python, AzureDevops) – Daily social media report showcasing Reddit users discussion of financial services brands online emailed to 100+ subscribed internal stakeholders.

iCodeInc, Instructor - Frisco, Texas, United States

Feb 2017 – Mar 2018

- Taught young students, grades 3 - 10, in computer science skills through project-based curriculum

- Lead projects using Python, Raspberry Pi, Scratch, and Alice to develop a hands-on learning approach
- Report each students' progress and focus areas following each session

Texas Woman's University, Math & Computer Science, *Tutor & Course Assistant*
Denton, Texas, United States
Jan 2017 - May 2018

- Conducted group and 1:1 sessions using original lesson plan with hands on work for Elementary Statistics
- Assisted students directly to assist in design, development, and debugging programming assignments

OPEN SOURCE CONTRIBUTIONS & PROJECTS

Signal Messenger iOS - Enable accessibility users to interact with 'sliding' actions on chats view (Objective-C)

SplishSplash – Native iOS app for browsing free high-quality photos (Swift 4)

- Enable users to browse, save, view details and preview images as wallpapers via Unsplash RESTful API

Ask Intuit – Winner of EarthXHack Intuit Challenge 2018

- Amazon Alexa Skill to answer users' questions leveraging data from Intuit's Q&A forums
- Designed and built voice interface using Amazon developer tools and Python Flask and deployed via AWS

Social Media Sentiment Analysis Web App (Python, Flask, Heroku) - Winner of HackUNT Data Challenge

- Collect and analyze Twitter data using VADER sentiment analysis and other Python tools.

COMMUNITY

- **Warm Hearts Sauna** - Manage bar during events, aid with cleaning, and other tasks as needed

- **Friday Night Skate** - "Blocker" safely block traffic to ensure group is safe from traffic and not split

- **DFW Inline Skate Club** - Founded and lead recurring weekly skate to improve Dallas skate community **2023**

- **The Resource Center Food Bank** - Volunteer at food bank and kitchen **2022 - 2023**

EDUCATION

Texas Woman's University - *Bachelor of Science in Informatics, Honor's Scholar*

May 2018
